Two searchlights have been installed approximately 1.8 kilometers south of the Vratsheba airfield, near to and south of the Sofia-Floudiv railway line on the east side of the road leading to the airfield. (See sketch on page 2). 25X1

Comment: The antiaircraft defense at Sofia continues to be increased. On the evening of 1 May, about 40 searchlights surrounding Sofia were illuminated. Nevertheless, it is possible that all of these searchlights were not permanently located around Sofia. Two searchlights were observed in the afternoon on 1 May at Knyazhevo on the road leading to Sofia. 25X1
